## (I've Got My) Future on Ice

Hank Williams Jr.

"I got a past That'll last me forever And enough memories for one man's life (that is true) The one I love She ain't comin back ever So it looks like I've got my future on ice

I got bottles and cans That just left my hand And a chill to just the right Fahrenheit O love let me down Now a truer friend I've found Why I've got my future on ice

There was a time She was my one and only Until someone else caught her eye Then for awhile, Can you believe I was acting so lonely? Now I've got my future on ice

I got bottles and cans That just left my hands And a chill to just the right Fahrenheit Yes love let me down Now a truer friend I found Now I've got my future on ice

O love let me down Now a real true friend I found Why I got my future on ice
