Whispers in the Dark

Hanoi Rocks

I saw you looking at me in the eye I was hypnotized, so surprised A memory from another time Hit me from behind, where could I hide

You touched me, you asked me If I never, how I met you, I left you Oh, please don't remind me Forget me, you kiss me, you touch me again

I can't forget, can't forget, can't forget you And in my mind I think of old times So every night I cry till it slides

This jealousy is burning, in things I see It's killing me, so it's killing me Now that I have to face what I've lost It's time to pay the price for my lies

You touched me, you asked me If I never, how I met you,I left you Oh, please don't remind me Forget me, you kiss me, you touch me again

I can't forget, can't forget, can't forget you And in my mind I think of old times I can't forget your Whispers in the Dark...

I can't forget your Whispers in the Dark I can't forget, can't forget, can't forget...
