

And I Waited

Hanson

Is there something wrong with the way you feel?
'Cause you've been acting like you're overloaded
Been going on like, you got something to prove
You better keep it in mind
Maybe it's too hot, out on the black top, nobody else is gonna
save you
You're pretty uptight, for being downtown.
I've been all up all night.

And I waited
Waited for something to arrive
Gotta keep this beat alive, but she keeps me satisfied
And I waited
Waited for something to be real
When it's pouding in your ear, doesn't matter what you feel
Where do we go from here?
The future's so unclear
You're such a doll my dear

Well there's nothing wrong, with the way you look
But you've been acting like you're up to no good
You're playing me like I've got nothing to lose
You better keep it in line
I'm not gonna get off, until the last stop, and nobody else is
gonna save me
Turn the heat up, for the meltdown
I've been up all night

And I waited
Waited for something to arrive
Gotta keep this beat alive, but she can't be satisfied
And I waited
Waited for something to be real
When it's pouding in your ear, doesn't matter what you fear
Where do we go from here?
The future's so unclear
You're such a doll my dear

And I waited!
