## **And I Waited**

Is there something wrong with the way you feel? 'Cause you've been acting like you're overloaded Been going on like, you got something to prove You better keep it in mind Mayve it's too hot, out on the black top, nobody else is gonna save you You're pretty uptight, for being downtown. I've been all up all night.

And I waited Waited for something to arrive Gotta keep this beat alive, but she keeps me satisfied And I waited Waited for something to be real When it's pouding in your ear, doesn't matter what you feel Where do we go from here? The future's so unclear You're such a doll my dear

Well there's nothing wrong, with the way you look But you've been acting like you're up to no good You're playing me like I've got nothing to lose You better keep it in line I'm not gonna get off, until the last stop, and nobody else is gonna save me Turn the heat up, for the meltdown I've been up all night

And I waited Waited for something to arrive Gotta keep this beat alive, but she can't be satisfied And I waited Waited for something to be real When it's pouding in your ear, doesn't matter what you fear Where do we go from here? The future's so unclear You're such a doll my dear

And I waited!
