## **Every Word I Say**

You feel like liberation You give me new sensation You show me what I need and You are my life completed

Can't stop, can't break, who's driving? Sometimes there's no denying Till today I feel I can't lose I'm letting go of what I knew

I want you for always I hear your name in every word I say I'm a fool and I don't care I hear your name in every word I say

Before you I was only What I let control me You are a revolution Against my own conclusions Till today I feel I can't lose I'm letting go of what I knew

I want you for always I hear your name in every word I say I'm a fool and I don't care I hear your name in every word I say

And now I say goodbye to the way I used to be There is no room for question Cause your name it sets me free Yesterday's troubles harm me Today's are creeping in So let go of the world around me Cause your love is all I need

I want you for always I hear your name in every word I say I'm a fool and that's okay I hear your name in every word I say

I want you for always I hear your name in every word I say I'm a fool and I don't care I hear your name in every word I say

Every word I say Every word I say In every word I say

I hear your name in every word I say I hear your name in every word I say I hear your name in every word I say I hear your name well all I hear is your name All I hear is your name All I hear is your name And no one can take it away Tištěno z www.txp.cz
