

## Feels Good

Hard-Fi

Lipstick, perfume, reminders of you  
Deny it, don't buy it,  
I'll never admit it but the fact is I'm a liar  
And my heart's on fire!

I said I'm too scared, too proud  
Can't you tell cause I'm talking too loud  
Just trying, trying,  
I've gotta gotta gotta gotta cover up my desire  
Cause my heart's on fire!

But it feels so good, but it feels,

Your name keeps running around my brain  
You're cocaine, you're gradually driving me insane  
You're sending me up in flames, you're propane  
You're running around my brain,  
You're running around my brain,

I can't eat I can't sleep,  
You're a hole, one I'm in way too deep  
I'm too tense I'm making no sense  
I'm a violin string and you keep on tuning me higher  
Cause my heart's on fire!

And it feels so good, and it feels so good  
And it feels, so good

Your name keeps running around my brain  
You're cocaine, you're gradually driving me insane  
You're sending me up in flames, you're propane  
You're running around my brain  
You're running around my brain  
You're running around my brain,

My heart's on fire!

And it feels so good, (3x)  
It feels,

Your name keeps running around my brain  
My membrane, you're gradually driving me insane  
Keeps running around my brain, you're cocaine  
You're running around my brain,  
You're running around my brain,  
You're running around my brain,
