## **Face The Night**

Remember when our love was strong Through the toughest times nothing could go wrong Now I'm gone and the wheels turn on and on In the hopes of a dream that came from a song But nothing in this world makes me feel like you do No matter what life could bring me Let it bring me right back to you

And I won't let you face the night alone Easy come never easy go I won't let you face the night alone I'm coming back

I'll never forget that look in your eyes Standing on your doorstep I was home for good tonight As time slipped away the boys they played on Their dreams turned to gold that came from a song But nothing in this world means more to me than you No matter what life could of bought me It brought me right back to you
