

All You're Getting

Harem Scarem

Don't wait til the end
To decide that you wanted in
It's all just a game
But you still don't need to lose
It's all over too soon

It's all you're getting
All you're getting
Overload just overload
Yeah come and get it
It's all you're getting
Overload just overload

No, just breathing air
Doesn't mean you're really alive
And just take a chance
Ya it's all here for you
It's all over too soon

It's all you're getting
All you're getting
Overload just overload
Yeah come and get it
It's all you're getting
Overload just overload

You fall

You get up off your knees

You stand
You stand for what you believe

Don't take it too far

It's all you're getting
All you're getting
Overload just overload
Yeah come and get it
It's all you're getting
Overload just overload
