

Say Good Bye

Harem Scarem

I'll walk along if it makes you feel alright
You've been trying to get to something that you're
holding down
Deep inside
You say you want a new start on your life
That you love me but you've gone a stray
So you hope that I'll be alright

I don't care why you're leaving
It still hurts me all the same
Cause darling I still need you
To get me through the day

Say goodbye the the love
And the good times that we shared
Now the memories are all I have
And it makes me feel so sad

I never thought that I'd hear these words from you
But the one thing I keep saying girl
Is what am I supposed to do
