Hollow Faces

Harmony

Welcome to this faithless masquerade Take your place and see what is new The winds of change will take your breath away All seems new but nothing has changed

Let the thing that you have lost your faith Let them believe that you have gone astray.

Break the silence and leave all fears How can we survive. Hiding all inside Break the bonds wipe away all tears Don't live in the shadows, Don't let the fool you

Staring into all these hollow faces They're burning you, just walk away Not a single one should make you stay Make the change and go all the way

Let the thing that you have lost your faith Let the believe that you have gone astray

Break the silence and leave all fears How can we survive hiding all inside Break the bonds wipe away all tears Don't live in the shadows. Don't let the fool you.

Break the silence and leave all fears How can we survive hiding all inside Break the bonds wipe away all tears Don't live in the shadows. Don't let the fool you.
