Hate

(peta babkama luruba anaku)

Concentrate and dissolve!  
Solar force - Flaming rage

Behold! We march together against the faith!  
We march together to smite the paradigm of life!

Let me drink your blame. Let me breathe your falsehood  
We burn the halls of mystics. We have come to open the  
graves  
May the gods be forsaken on altars of shame

May they wear crowns of thorns  
May they swallow all despise!

Sacred doorways where darkness descends  
Slaves in raptures sick of unknown disease  
Feeble minds lust for oracles

[Solo: Destroyer]

Blasphemous rites as old as the earth  
We burn and cut the living flesh  
Years of silent sorrow grim and dark  
Buried in eternal night!

[Solo: Destroyer]

Mystic descent  
Solve et coagula  
Where the stars await  
Fractal light of all galaxy  
The center of slow entropy  
To find the core, the eye, the key...

I witness the astral existential truth unfolds!  
The archetype, the light bearer  
In the cycle of omega star  
Black riders of anunnaki fight time - The great  
oppressor  
Masters of transition, vice and perverse  
Set the fractal light free!

Alchemy of Blood!  
One who reveals its secrets will prevail  
Ruling over nature - The light search to save the grain  
Desecration and tragedy  
It is time for verdict...
