

# Never Let It Die

Hatebreed

The flame was almost extinguished and the will had faded and escaped from me  
Two years have passed and they wilted away all that was left were memories of days I never lived

Now the fight is on, until there's nothing left  
I'll fight like never before  
The fight is on, until my final breath  
I've never wanted anything more

I must never let it die! x2

Bonds are strengthened when they've been tested and mended when they've been torn  
So give all of yourself that there is to give  
Cause in life to have never risked is to have never lived

Now the fight is on, until there's nothing left  
I'll fight like never before  
The fight is on, until my final breath  
I've never wanted anything more!

I must never let it die! x4

So resolve, reassure and push on without fear  
Ignite the flame, because only you govern what tomorrow holds  
It's inside us all waiting to be awoken  
It's more than words describe  
This is the spark, let it burn, make it build  
It will never be denied

Because the fight is on, until there's nothing left  
I'll fight like never before  
The fight is on, until my final breath  
I've never wanted anything more

I must never let it die! x4

Will we let it die? NEVER! x7

NEVER!

I must never let it die! x4
