

In the blood of every lost soul
Runs the venom that turned eternal
Bliss into a living hell
It's spreading like a virus
One you cannot kill

This venomous game is my creation
I made you who you are
There is no cure for this evil
Causing the panic to spread

Let there be chaos and let it reign
It will make the brave new world
Bite until it bleeds
Malice is the new disease

The flesh I've tasted, the seed I've sown
The venom eats you from the inside
You're on your knees begging to be saved
Begging me to put an end to the agony

Let there be chaos and let it reign
It will make the brave new world
Bite until it bleeds
Malice is the new disease

Malice
The venomous kill
Venom
The malevolence of this world
