

## What I See I Despise

Hatesphere

It's been feeding on dark thought in me  
Spreading rumours in my mind  
Building anger in my heart  
Burning hatred in my eyes  
Now I see through all the lies

What I see I despise  
What I see I recognize

I twist their every world  
To find a crack  
To see the truth  
To find the place I've been used  
To find a piece of me in you  
To find something I can abuse

Now I see  
You need me to put your weakness on  
I spit on the hand you offer  
Spit on the words you speak  
You will never find me trusting  
You will never find me weak

What I see I despise  
What I see I recognize  
It's all sickening to me  
All these good intentions

I Remember all the times you let me down  
When I found myself alone  
All the times you weren't around  
Left me time to think  
Who you are  
What you give  
What I need  
What I see I despise  
What I see I recognize

I don't need no one but me!
