

Hell

Have Mercy

You laid there shaking on the bed
Forgot what everybody said
And I don't think of you or any lie you fed
It's all in your head
Now it's all in my head

You laid there trembling on the floor
Forgot what all of this was for
Now I don't think of you at every closing door
Anymore
Anymore

When you came back from hell
Your eyes were filled with fear
I've got this old note saying "I wish you were here"

When you came back from hell
Your eyes were filled with fear
I've got these five words saying "I wish you were here"

If you could have it your way
You would've been the one who left that day
To all my friends who wished that I could've stayed
You don't want me
So I'm gonna find someone who may
To say

When you came back from hell
Your eyes were filled with fear
I've got this old note saying "I wish you were here"

When you came back from hell
Your eyes were filled with fear
I've got these five words saying "I wish you were here"

When you came back from hell
Your eyes were filled with fear
I've got this old note saying "I wish you were here"

When you came back from hell
Your eyes were filled with fear
I've got these five words saying "I wish you were here"
