

# I Am On Your Side

Hawthorne Heights

I never meant to hurt you  
Sometimes these thoughts have a way of making sense  
Secrets that we keep turn into accidents  
If you burn away the bonds with the fire of selfishness  
The positive and negative have a way of blending in

End this now, we've gone too far  
Let's take back words that turn to scars  
If I could find a way to turn back time  
Had to let you know I'm on your side

Took the easy way out I shut myself down  
The only way to ease the pain is to drink until I drown  
I'll say it out loud my voice is the only sound  
So listen up, I'll spell it out  
I need your help, I need it now

End this now, we've gone too far  
Let's take back words that turn to scars  
If I could find a way to turn back time  
Had to let you know I'm on your side

Am I now everything that you wanted me to be  
tried my best took a shot in the dark and I lost

End this now, we've gone too far  
Let's take back words that turn to scars  
If I could find a way to turn back time  
Had to let you know (had to let you know) I'm on your side  
If I could find a way to turn back time  
Had to let you know (had to let you know) I'm on your side
