

# Long Way Down

Hayden

Do you ever go  
To the places we both were known?  
Do you walk where we used to roam?  
And do your thoughts go by me in their flow?

When I'm alone, sometimes I need to know  
Baby it's a long way down  
And I wonder how you've changed?  
Have the years left trails I cannot trace?

Has your brain lost cells it won't replace?  
And are you light, or weighed down with mistakes?  
When it gets late, sometimes I see your face  
Baby it's a long way down

Baby let your feelings show  
It's all I need from you to let go  
Cause baby, I can't stay this low  
And there's so much I need to grow

And I know you never go  
To the places we both were known  
And you don't walk where we used to roam  
And your thoughts don't pass me in their flow

'cause if they did, I wouldn't be out alone  
Baby it's a long way down  
Baby let your feelings show  
It's all I need from you to let go

Cause baby, I can't stay this low  
And there's so much I need to know
