

Long Way Down

Hayden

Do you ever go
To the places we both were known?
Do you walk where we used to roam?
And do your thoughts go by me in their flow?

When I'm alone, sometimes I need to know
Baby it's a long way down
And I wonder how you've changed?
Have the years left trails I cannot trace?

Has your brain lost cells it won't replace?
And are you light, or weighed down with mistakes?
When it gets late, sometimes I see your face
Baby it's a long way down

Baby let your feelings show
It's all I need from you to let go
Cause baby, I can't stay this low
And there's so much I need to grow

And I know you never go
To the places we both were known
And you don't walk where we used to roam
And your thoughts don't pass me in their flow

'cause if they did, I wouldn't be out alone
Baby it's a long way down
Baby let your feelings show
It's all I need from you to let go

Cause baby, I can't stay this low
And there's so much I need to know
