## My Wife

## Hayden

You're looking in on my life and I don't think I like you aroun d here You're looking right at my wife like she's part of the dinner w e're serving you You told me yourself over beers how you felt when you let her g 0 When the coice was between a family and the way things were But nothing remains the same once decisions like that are made You're treating both of my kids like a prize that was taken awa y from you You roll into town, live off your sound and do what you need You live for the chase, just getting a taste of whatever you pl ease Then you stay at my place and realize the choices you made were mistakes So look one more time at my love and you'll find that it's here to stav Your stupid lines and the thoughts just behind are not working today Get back on that bus, you'll forget about us in a week or a lay You're looking in on my life and I don't think I like you aroun d here
