

## Leave Here Standing

Hayes Carll

Don't take me down that road again  
I been there once before my friend  
It seems I've lost near everything  
And I can't lose no more

Well dreams are made for restless hearts  
I should have known that right from the start  
That every lover plays their part  
Or the whole thing comes undone

And I know I'll leave here standing  
That's just the way it's always been  
I'm scared I'll close my eyes and then  
I'll never look on you no more

Oh sweet angel it's time to go  
The summer rains are winter snow  
And I just wanted you to know  
I miss you when you're gone

So take a breath and ease your mind  
Go on and leave the past behind  
Some things you won't ever find  
Looking way too long

And I know I'll leave here standing  
That's just the way it's always been  
I'm scared I'll close my eyes and then  
I'll never look on you no more  
(2x)
