

# Please Baby

Haystak

Yeah

Sometime women complain about the fact they might get a man that don't want to work, and then they end up with a workaholic and they complain about the fact they got a man who's not never at home. So I guess its like the gift and the curse, or maybe you should watch what you wish for because you just might get it.

I need a clock with more hours, a calendar with more days  
To compensate for spending so much time away  
It drives me insane when I'm signing autographs  
And she sends me pictures of my daughter in the bath  
And I miss that, because I wish I was there  
Who wins? The player or the square, call it in the air  
I'm just not your 9-to-5, suit and tie, clock punching type of guy  
But we both knew that (Please Baby)  
Believe me when I tell you it's true  
That I'm not thinking bout any other woman but you  
That's why I do what I do and keep it moving  
My love is perpetual and forever be improving  
I send you shopping with the babies and buy you things  
To compensate for the time with furniture and rings  
Like to say that I'mma stop, but that'll be a lie  
I just need you by my side and believe me when I say

(Please Baby) Understand that there is no perfect man  
Lil' momma I promise I'm doing the best that I can  
(Please Baby) Stay focused and stay right here by my side  
And don't cry, please baby don't cry

I hate leaving you, but my faith is strong 'cause I believe in you  
I know how men do and women too  
I put you in a position to protect my best interests  
Knowing that you could make me resent this  
(Please Baby) I know I'm always gone  
Either always on the road, or always on the phone  
And it kills me, cause I'd rather be at home  
I can't speak my mind, so I do it with these songs  
(Please Baby) Accept the fact that I've changed  
I'm not the person that I was when we started this thing  
(Please Baby) Believe that I know it's not a game  
For this to end on crooked terms would be a shame  
So I gave you a ring, and I gave you my name  
Hoping you would feel repaid for the temperament and pain  
And you passed every test with flying colors  
And that's why motherfucker die for ya

I'm knowing other women envy you  
They want their last name to be Winfrey too  
Go to the pen for you, go to the hole for you  
And this work that you see me doing is all for you  
(Please Baby) Just stay down like four flats  
If for no other reason, I always had your back  
And you should never wonder where my heart or my head's at  
I said I Do and knew what I was doing when I said that  
For better for worse, sickness and health,  
Like everyone who ever loved me, I done put you through hell  
Please, baby be cautious because you have the authority

To make a bad decision and destroy me  
That's what it means to love completely  
I'm gonna give you what I got and if you beat me, you beat me  
We seem to have it under control for now  
Because we done came to damn far to turn around

Repeat Chorus

Repeat Chorus
