Gettin' lucky is the name of the game What you call it, it all means the same Put on your good looks and your dancing shoes Go downtown and try to shake those blues But you know, another night Another number, gettin' lucky

Tryin' the hot spots with the bright funky lights Look for the love and stay out of the fights Talk to the people but you know that it's true Even if they like you, the joke's on you 'Cause you know, another night Another number, gettin' lucky

Livin' in a dreamy world that's full of tinsel and glitter When the morning comes, why are you always so bitter You know what you're gonna find and you know I'm right You'll come home with a number from another night (aah ooh)
