

Together Now

Heart

Deep inside this city night, only you and me
I can only hear your voice and all you see
Baby I love you, born to be mine
I'll say forever, you say all the time
Take it like a vow
We're together now

Together now, together now
Together now, together now

In this world so fast, nothing lasts
But I can feel it
We're gonna to make it together

Now you're winning in big town trade
Lose it once, try to get saved
Talk gets cheap, money gets made
In too deep, time steals away

I call you up, get you on the line
Wanna get back, where we were that time
Wanna get you out, out of this place
Hold you close, just to see your face

Together now, together now
Together now, together now
Together now, together now
Together now, together now
