This night's gone, we're moving on Highway's calling out aloud I bring them in with eyes of sin It's a down drinkin' freaky crowd

I chew you up and I spit you out
Never want to know your name
Don't want to know you just I sure want to show you
Never will forget I came

On the world's all mine
White lightning and wine came on so fast
When did I last feel this fine?
Ooh yeah
White lightning and wine, yeah

Sweet little one, let me love you some Take me or leave me alone The gooder they come, the harder they fall Turn around you are a nasty joke

Yeah, we all laugh oh, hah, what a gas Watching you chew on the bones In the morning light you didn't look so nice Guess you'd better hitch hike home

On the world's all mine
White lightning and wine came on so fast
When did I last feel this fine?

On the world's all mine
White lightning and wine came on so fast
When did I last feel this fine?
Yeah yeah
White lightning and wine

Alright Alright Alright Alright
