## **Spirit In You**

## **Heather Nova**

Under your skin there's something beckoning There's something that makes me believe in you Behind your eyes, that's where the sacred lies You know I need to get through Oh here I go again Through the undergrowth again Feel the earth move, the planets spin

But I can't get through It's the spirit in you It's the spirit in you It's the spirit in you That I want to find I've seen your face, the one your mother made Now let me see what makes you really move I know you're scared, I know it's tender there

Just let me closer let me get through O here I go again Through the undergrowth again Feel the earth move, the planets spin But I can't get through It's the spirit in you It's the spirit in you It's the spirit in you That I want to find

And when you make me feel When you make me bleed My lucky stars fall down on me You know I need to know you I need to see I need to take ahold of what's underneath So close your eyes, close your eyes Unlock your mind, unlock your mind Throw off the fear, and let us fly O here I go again

Through the undergrowth again Feel the earth move, the planets spin But I can't get through It's the spirit in you It's the spirit in you It's the spirit in you That I want to find It's the spirit in you It's the spirit in you It's the spirit in you It's the spirit in you
