

Change Your World

Heather Small

You bear the scars from someone heartless and selfish
Altered your mind 'til you can't see your way
And now you stay 'cos you feel worthless and foolish
Hey girl don't let him drive you insane

If you could see your glory
Embrace yourself and all of your beauty
If only you could see your glory
That inner grace, why can't you believe me

You got all of the strength and power
But your picture is not complete
If you can't live this life forever
Better look inside yourself and change your world

With burning hands he demands night and day
You sacrifice your passion under stress
Don't let those tears you cry be cried all in vain
Don't lose your soul through your selflessness

If you could see your glory
Accept yourself and all of your greatness
If only you could see your glory
Follow your dream on to a brighter day

You got all of the strength and power
But your picture is not complete
If you can't live this life forever
Better look inside yourself and change your world

Keeps you hanging on with empty words of love
He believes that it's enough
You know in your heart it's less than you deserve
But a change is gonna come

Change your world
Look inside yourself
You've got to change your world

Change your world
If you could see your glory
You can change, you can change your world

Change your world
Look inside yourself
You've got to change your world

Change your world
If you could see your glory
You can change, you can change your world

You got all of the strength and power
But your picture is not complete
If you can't live this life forever
Better look inside yourself and
Better look inside yourself and
Better look inside yourself and change your world
