## Blackout

Heatmiser

Asked your permission, didn't I? To self medicate this way once in a while But you're afraid of everything Your love's a resume, you can't appreciate anything

Dead on the sofa with the record running Baby, I can't help it Letting you down

Got your attention, didn't I? Crying, coming apart right here before your eyes You aren't disappointed, are you now? I'm still listening, just tell me what you want I won't feel a thing, just tell me what you want

Leaving your world wasn't my decision Baby, it's not easy Letting you down
