Who'll Stop the Rain

Who'll stop the rain Who'll stop the action East side west side The world moves on

I heard a rumour that fires were started Flame in the streets and tension uncharted Bigger than life at the edge of the city Ashes and diamonds gleaming with pity

Who'll stop the rain Who'll stop the action East side west side The world moves on

Between midnight and dawn you slept through the deadlines Believe in me and we'll hit the tall headlines Look up and laugh be happy today Here come the waves count three pray

Who'll stop the rain Who'll stop the action East side west side The world moves on

A global affair in big house U.S.A. A moving violation angels over Broadway The next voice you hear will be the main attraction The next time we love standby for action

Meet me tonight and love me for ever Let's be happy let's be famous whatever the weather The rain must fall and night time is calling Golden boy and golden girl it's a great day in the morning

Who'll stop the rain Who'll stop the action East side west side The world moves on
