## **Flashes**

## Heaven's Gate

The night awakes, there's nitro in the air we're human dynamite, exploding everywhere for a twilight generation gettin' wild and loud like burning fire, believin' there's no doubt

We rock, we roll, we're taking control the time is right now, we want it all

Gives all the size, can you feel it it's breaking the ice, breaking the ice comes out to heal burning fever it's breaking the seal THE FLASHES, THE FLASHES OF STEEL

From here to eternity the stronger will survive a human dynamo, kickin' and alive turning up the power 'till the sky is breaking up believe in metal gods, they will never stop

Bodies are revvin' like wheels in the night the mind gets delirious from power and light a face fearing up all your senses to feel if you don't believe in the flashes of steel

From here to eternity the stronger will survive a human dynamo, kickin' and alive
