Inside The Universe

Heavenblast

Galaxies like lamps in the dark, Black holes lost in the bottom of the space

Fly with no more weight, With no more mark and under me There is just the immense Jump with no more support, Open wide the eyes, around me Nothing is hidden

Now I am no more inside Anything, and out there All seems so different I try to tighten the hands And I contain all the eternity in them

[Chorus] Inside the universe galaxies that You will not ever reach no more Look in your hand, try to suppose Where your immense is laid

Now I am just looking for, I regret the gravity And I vague in everything, Planets distant from the earth Who knows where do they go, Where is the return

Inside the universe each reality Is an immense treasure, imagine Inside yourself, without horizont Your sight get lost again

Search what you have lost, Try to go back, Your sun is aloof like your world

I'm flying into the dark, It's the only reason left I don't know why but it's the only way To return to my home

Fly with no more shade, Without knowledge of the way, There is just the immense I close my eyes in vain, There is no more wind To push on the sail

Now my journey is lost in time, Perfume of a past time, In my hand there is my earth I pray for I could find the way Of the return, what was about my world

Inside the universe my unchained song

Doesn't find response, I miss What I have lost The lonliness Kills me so slowly...slowly....
