Riding Through Hell

Heavenly

All we want is to survive defend our land and our life In our hand a metal blade to fight this force of (raging) hate

Brave at heart we'll face the end united we must stand For our kingdome we will die, raise our banners high

Riding through Hell For freedome we fight in glory we're. Riding through Hell

For all our people, who are praying for us For all the victims, who believe in us They must know: We'll be always there! To protect our land forever!

Riding through Hell For freedome we fight in glory we're. Riding through Hell

Now the battle comes to end Down on their knees the enemy will repent Now the king retakes his crown never let it down - again!

Riding through Hell For freedome we fight in glory we're. Riding through Hell
