

# The Dark Memories

Heavenly

After the nightmares  
Weak is our mind  
It could be the devil hiding inside everyone  
Throughout these visions, it's reality  
But now it makes me wonder should I  
carry on my way

So close to the edge  
Black is the night  
From here to madness there's only a short step to die  
Lost in the trouble, eternally  
I am crawling in the fire and reaching eternity

Far away  
Beyond the sky  
I come alive again  
Screaming in the wild  
Resound everywhere  
The light is in the air

I still believe  
Cold is my way  
I'll do all in my power  
To leave the pain  
Just behind me, use your mind  
Relieve your soul

Head into the wind  
Cold is my way  
Make my mind go blank  
To leave regrets  
Just behind me, use your mind  
To rise above  
With all your might, use your mind  
And relieve your soul

As we know time is a great healer  
Salvation and hope set me free  
My joy of life and happiness returned  
I'm still fighting against relapse  
But the light will shine forever  
The scares will never leave me  
Laughter kills time whereas tears seem long  
We're not controlling our ways  
Within living memory  
Salvation

Head into the wind  
Cold is my way  
Make my mind go blank  
To leave regrets  
Just behind me, use your mind  
To rise above  
With all your might, use your mind  
And relieve your soul

As we know time is a great healer

Salvation and hope set me free  
My joy of life and happiness returned  
I'm still fighting against relapse  
But the light will shine forever  
The scares will never leave me  
Laughter kills time whereas tears seem long  
We're not controlling our ways  
Within living memory  
Memory, memory, memory
