

# Until I Die

Heavenly

There're sometimes when I'm far away  
and fight so hard to save the human race  
I want you to be by my side  
if you're not here I can't fly

Take my hand and come with me  
I'll offer you everything you need  
I'll show you that love is not a lie  
and I'll always be with you until I die

Now it's time for you and me  
to find the words and to break free  
how long could you wait  
you are my fate

But before you know what you feel  
you must know that you light up my life  
and make me real  
but before you know you let me dream  
and I drawn in your eyes so divine  
and I hope soon you'll be mine

Once again you're on my mind  
if you're not there i can't survive  
but I can change the world and make it bright  
on the quest for love I will fight until I die

No time for strangers  
who try to separate us  
cause you know  
my life depends on you  
and you can make my dream come true  
I'll guarding you anywhere  
I will be there

But before you know what you feel  
you must know that you light up my life  
and make me real  
but before you know you let me dream  
and I drawn in your eyes so divine  
and I hope soon you'll be mine...

But before you know what you feel  
you must know that you light up my life  
and make me real  
but before you know you let me dream  
and I drawn in your eyes so divine  
and I hope soon you'll be mine
