Heaven Is Here

Helene Fischer

I feel as if my heart could dance Up to the stars, ascend Where the air is so clear You hold me close all through night The magic feels so right It's like heaven is here I see a rainbow in in the sky And though it's dark outside You taught me how Each time I know that you are near It's like heaven is here And I - I know that this is where I've never been Now it's so clear I fly on clouds upon the the wind It's like heaven is here And I - I found your hand though I couldn't understand How close, how near The day you came into my life It's like heaven is here Now I woke up from my pain And I could breathe again All my senses were there I'm through with wearing only black My laughter has come back Because heaven is here Now you're my lighthouse in the dark Just like the missing part That I so need Since I surrendered all my fears It's like heaven is here And I - I know that this is where I've never been Now it's so clear I fly on clouds upon the the wind It's like heaven is here And I - I found your hand though I couldn't understand How close, how near The day you came into my life It's like heaven is here And I - I know that this is where I've never been Now it's so clear I fly on clouds upon the the wind It's like heaven is here And I - I found your hand though I couldn't understand How close, how near The day you came into my life It's like heaven is here It's like heaven is here
