Lately, all the nights are all the same Since you said goodbye I'm all alone, the only voice is my own

Did you hear me? Are you near me? Did you know that I hurt this bad? Did you love me? Did you need me? Whole world just a dream I had

This memory haunts me forever

Better run for my life, hide from the light Dark is the night, deep cuts the knife No way I'll get away Memories here to stay, deep cuts the knife

Lately, I see your face in everything I do Sleepless nights I lie in bed just thinkin' of you I can't pretend that I don't need you back again

Did you love me? Did you need me? Well alright, but what's so wrong?

This memory haunts me forever

Better run for my life, hide from the light Dark is the night, deep cuts the knife No way, I'll get away Memories here to stay, deep cuts the knife

I am your slave, got no defender You flash the blade I can't escape, I can't surrender

Run for my life, hide from the light Dark is the night, deep cuts the knife No way, I'll get away Memories here to stay

Better run for my life, hide from the light Dark is the night, deep cuts the knife No way, I'll get away Memories here to stay, deep cuts the knife

Deep cuts, deep cuts the knife (Deep cuts the knife)
Better run, better run for my life (Deep cuts the knife)
Oh, deep cuts the knife (Deep cuts the knife)

Oh, memories here to stay It won't go away Deep cuts the knife
