

## Call N' Return (Say That You're Into Me)

Hellogoodbye

You promised me starry night skies  
They just remind me of your shining bright eyes  
I'm missing your voice at night time  
This sepa-separation seem-seems a sad crime

B-b-b-  
but don't don't don't think think think I forgot you you you  
Are are are oh so sweet I I I - I knew

If only you were here  
Things would be more magical

If I was there  
Right now would be more radical

You're so not near  
I'm wishing I could place a call

And feel closer to you ooo-ooo

The miles of air and road and land  
That separate me from all my plans  
Were havin' havin' havin' havin' fun  
But something something tells me I miss someone

B-but I hope hope hope you didn't forget me I couldn't  
Forget you the whole time I always knew I knew

Say that you're into me, let me know how it will be  
If you don't know just say so  
I'll wait till the perfect time think of all the perfect lines  
I'll make sure if I let you know

We've got movies on our list to see  
Things to do just you and me  
Calls to make from here to there and back  
We've got fun to have and days to spend  
Stars to see or just pretend  
At least for now just keep things right on track
