I Saw It on Your Keyboard

Hellogoodbye

There exists a melody That just might change your mind Oh! If only I knew the key To sing to make you mine

Then I saw it on your keyboard You saw it on my sleeve Oh! I never knew a heart existed Outside of make believe Then I read it on your keyboard I knew at least that I might have a chance To catch a shooting star

There exists a star above That always steals my stare And there exists a star on stage That never seems to care

And then I saw it on your keyboard you saw it in my eyes Oh!I didn't mean to scare you You just seem really nice And then I saw it on your keyboard I knew at least that I might have a chance To catch a shooting star. oo oo oo oo oo, oo oo oo oo oo (4x)

There exists a melody That just might change your mind Oh! If only I knew the key To sing to make you mine.

oo oo oo oo, oo oo oo oo oo oo (7x) (There exists a melody that I, know. oh oh oh oh oh oh oh)
