

## Stuck to You

Hellogoodbye

Holding my breath  
For a whole month  
If I held your breath  
At least we would touch

Keeping from you  
Keeps me from sleep  
It's just this bad beat  
That I just can keep

Oh girl, it's true  
I can never be away from you  
It's like you gloss your lips with glue  
Oh we kiss and I am stuck to you

My hearts on the floor  
My feet feel like lead  
I'd quit the tour  
But I'm already dead

Our only connection is synthetically  
We show our affection electronically

Oh girl, it's true  
I can never be away from you  
It's like you gloss your lips with glue  
Oh we kiss and I am stuck to you

We lock lips and throw the key out  
till it slips that  
I must leave town  
Our love reaches  
Across oceans  
To your beaches  
Lonely notions

Oh girl, it's true  
I can never be away from you  
It's like you gloss your lips with glue  
Oh we kiss and I am stuck to you
