

The Magic Hour Is Now

Hellogoodbye

I need to see the sunset
So I can give my eyes the sense that
Something in the world will end
Nothing ever ends

I want to feel infinite
But I don't think my heart's that in it
I just want to remain in love
Like everybody does

The thing about the sun is that
It's going to set and rise again
Over you

Every time you run away it gets closer
You can't escape it's raw power
It's coming up
The magic hour is now

I want to feel infinite
But I don't think my heart's that in it
I just wanna remain in love
Like everybody does

I wanna be your lover
I'll never ever touch another
I just wanted to see the dawn
We'll watch it from the lawn

The thing about your love is that
It's gonna let some sun light in
Just for you

Every time you run away it gets closer
You can't escape it's raw power
It's coming up
The magic hour is now
The magic hour is now

The magic hour is now
You cannot slow it down
The magic hour is now
The magic hour is now
You cannot slow it down
The magic hour is now

Every time you run away it gets closer
You can't escape it's raw power
It's coming up
The magic hour is now
The magic hour is now
The magic hour is now
The magic hour is now
The magic hour is now
The magic hour is now
The magic hour is now
The magic hour is now
