

## Starlight

## Halloween

You're hangin' around and got nothing to do  
You wanna get out some pills in front of you  
You fly on invisible wings  
Be careful my friend for too many can kill  
You say that's the meaning of life's those pills  
You forget all eathly things

You Swallow your pill you wanna feel free  
A trip to a world made of games  
You do it again yet itps never the same  
But a junkie's not something to be

Starlight fallin' deep through your eyes  
Starlight shinin' down for your soul to arise  
Now there's a needle lying in front of you  
I'm frighten of those things  
But I know what you'll do

You neet to scape from the night, ha ha  
You ride on through heaven you don't feel the pain  
You ride on and reide on again and again  
On the needle that brins you the light

You feel the mind-blowin' stuff  
Flow through your veins  
You take off and fly to the sun  
But when you get too near your wings will be burnt  
You'll die in the flames and you'll fall

Starlight fallin' deep through your eyes  
Starlight shinin' down for your soul to arise  
Starlight fallin' deep through your eyes  
Starlight shinin' down for your soul to arise
