

## Calm Before The Storm

Her Bright Skies

It's where it all starts  
when it itches in your fingers  
the speed of a race car  
my god  
it all comes clear to me

We're gaining speed now  
the ground beneath us fades away  
we're having so much fun now  
aren't we having fun

An overheard conversation  
silence, shut your ears when I scream out in pure desperation  
someone pull me off the face of the earth

Cover my ears  
open my eyes  
between the words and melodies my heart pumps to every beat  
we're gaining speed now  
the ground beneath us fades away

An overheard conversation  
silence, hide your tears when we sit in front of our television  
someone pull me off the face of the..  
between the words and melodies my heart pumps to every beat  
cover my ears  
open my eyes
