

# Two Tin Cans And A Length Of String

Her Space Holiday

I'm finding it funny our future feels lighter despite all the weight and the bits of bad news  
I will get stronger and you will get healthy like two child stars who nail their cues  
Each scene is acted and beautifully crafted with rhythm and reason that's brilliantly true  
The credits are rolling the crowd is applauding and there will be nothing but four-star reviews

We love you we love you we love you we love you  
We love you we love we want you back home  
Please understand that there's no need to worry  
We're perfectly able of running the show  
We love you we love you we love you we love you  
We love you we love we want you back home

In the town where I grew up  
There was no one else just the both of us  
With two tin cans and a length of string  
That carried the words from you to me  
So we sat and we talked about  
Sharing our days in every way  
On a big pink porch with a broken swing  
Sitting arm and arm and resting cheek to cheek  
We'd blink our eyes  
Exchange a smile  
Knowing that this is the rest of our lives

This is love

I remember the day that the spot was found  
The kids moved back just to help us out  
You held yourself with such dignity  
Saying the last thing I want is to burden you three  
He would draw and she would read  
And I would pray and the pets would sleep  
I know that time wasn't so easy  
But to me we never felt more like a family

This is love

After some time things got a little hard  
So we checked you in and kept checking your charts  
I wonder if any part of you knew  
That two weeks later we'd be sharing the room  
So we sat and we talked about  
How we spent our years with the laughter and tears  
On big white beds with old gray sheets  
It was just like being back on that swing

This is love

In the town where I grew up  
There was no one else just the both of us  
On a big pink porch with a broken swing  
Sitting arm and arm and resting cheek to cheek

Now this is love

We want you back home
