

I Try To Talk To You

Hercules and Love Affair

We could've skipped this part,
I could've thought you how to love yourself
I waited patiently,
I hoped that you will be the one to come to me
I TRY TO TALK TO YOU,
I thought that you would recognize the need
That you had deep inside
But you have to get there by yourself!

I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene
I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene!

You didn't have to go,
You didn't have to add this to the next
You let â€˜em use you good
Baby turn around and say your sake!
Is this what you deserve?!
You're just a man, I'm a human being
And will you listen now?!
This doesn't have to be the way things END!

I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene
I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene!

Why don't you come to me?

I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene
I don't understand how we could lose
Tell me everything you make me see
Know that I won't give you anything
I've taken away the pain, taken away the scene!
