

Following the endless path, towards our own decay we're walking

Suffocating in these sulfur winds, crushing inanimate bodies
There has been for long no turning back, for the ones ready to
face the storm...
I lead the way again

Towards the black Nemesis
Deconstruction in Human Blood
Towards the black Nemesis
We surrender to you

In this No man's land there is no longer life
Every human traces are fading
Terrifying storms of fire and ice, the end of a reign down in
the abyss
Nothing to see but the black clouds, nothing to hear but the t
hunder
I close my eyes and wait for my end
Back to mother earth

Towards the black Nemesis
Deconstruction in Human Blood
Towards the black Nemesis
We surrender to you
No reason to raise again
Take us in your arms
"There's no reason to raise again, now you can take us in your
arms"
No reason to stand against
Again
