

Change Your Life Line

Hibria

You were defeated one more time
By the faceless in charge
Ruler of lives
You've never lived your real fate
Cause you were undesired
Over and over the times

Burning and dying in vain
Steel Lord look deep at my light
Come on - watch your lives all together
Come! See yourself thru (time)

The past life vision is now your prize
Catch it and use it to change your life line

You tried hard to show the world
The Inquisition was wrong
You burned as a witch
You wanna leave the revolution
To have freedom of speech
You were shot by the Berlin wall

I don't wanna have this feeling any more
Not accomplish what I fought for
Now it's my turn to change it all
Anger is my fuel to destroy
Mercy and justice to whom will die
Freedom of mind to the land I will fight for

I won't believe in their justice
I won't be trapped once again
Death to the ones who slave minds
Strength and honor to all who will fight
Pride and glory to all survivors
