

Living Under Ice

Hibria

You made me stand
The pain of fire burning all my veins
Frozen remembrances
We dream to meltdown to live it all again

Living under ice
Is our battle lost?
Left behind we were but our men are marching on

Please make me believe in
There is a spark to light me at all
I'd burn myself to melt it down
Not to be living under ice

My latest breath of fire
Struggles on to make you blind it all again
I'm tortured by time
My fuel is freezing and so my will to fight

Make my wonder why
I shall not believe
In everlasting coldness if we're
Living under ice

To melt the ice around you light your soul
And burn the limits inside you
Your heat will start the flames
Of the encaged men
Melting down the cage
