## Will We Be Again

## **Highland Glory**

In my dreams I have seen future and past Love that is lost, dreams turn to shades Where are you now, can we be like this once again

Lost in your touch I was little and scared And I used to feel empty inside I'm waiting to see eternity with you In my mind our love is true

Thinking of the sunset we once shared in a dream I have held your hand all through And through the darkness and divinest light Will we be again

I turn out the lights, another day has gone I wake up to see, if you are here with me Is it real or are you here in my own fantasy

I wake up early then I turn on the lights To find that you were never here Am I going insane, can this be real Have I lost you for all time
