## **Anywhere but Here**

When I'm in a crowd Or on an island by myself Silent or too loud Wishing I was somewhere else And I can't believe You hit me fast and hard When you turn to me and say Never change the way you are

Trying to catch your eye Things will never look the same Now I can't deny You're the moth and I'm the flame There I go again I should walk before I run How can I explain I can't stop what you've begun

[CHORUS:] I'm falling through the door Flying 'cross the floor When you look at me suddenly it's clear

You're burning up my dreams Crazy as it seems I don't wanna be anywhere but here Anywhere but here

What goes on inside Is a mystery no doubt A roller coaster ride I may never work it out Here's the brand new me Skates around and floats on air I'm a sight to see Rainbow colors in my hair You have set me free The one who gets me there

[CHORUS]

Here is the place where My head is spinning Time is beginning To race away You come to throw me Knock me off my feet You give me wings to fly The world goes crashing by again

[CHORUS 2x]
