

# Live and Let Go

Hilltop Hoods

All these days I've been broken and hopeless  
And I, and I don't feel like I'm coping, I'm hoping  
That I, that I can live and let go  
So I can get through it  
Yeah, I can live and let go  
So I can get through this

You know the pain can  
Hang in the air like cigarette smoke, right?  
Sometimes trying to live and let go  
Like trying to talk with a mouth full of sediment though  
I'm trying to crawl out the scattered missile  
I can see through the eyes of a loved one, eyes of an enemy  
Rising above sometimes takes a pedigree  
That I fear that I don't possess  
And turns hope into hopelessness  
But I won't depress  
Won't let life wear me down  
Staring down as the troubles all rush past  
Some part can wear me down  
But wear a frown like a handlebar mustache  
So we live, I forgive and forget  
Rather than to live with regret  
It's like living with debt  
It's a weight that'll curve your spine  
Living with hurt is like serving time

I pay homage to obstacles  
Thin line between honor and horrible  
The healing heart knows the eyes must overflow  
Tears clear the windows that guard the soul  
Now that the water flow, you can scrub the mud out of your land  
The blood out of your hands  
But you still gotta cleanse your heart that's trying to beat inside  
And it's only purified by the tears you cry  
You can fight all the devils and slay them  
But if you're made hard at the days end then they win  
There's only one force that can solve all this  
I want the warm heart that we all start with  
Sometimes we march out, ball our fists  
I will give it all up for my softness  
You will never invade my Holy place  
I let the tears dry on my face

If these walls could talk they'd sing a somber song  
And if we stronger from this world that goes on and on  
We're scarring like that I made a promise from  
For the feeling time to be sitting on a bong  
So disengage, hopelessness fades  
Reaching out but the dark taking focus away  
This road's paved by the brave without knowing the way  
Don't stray, nobody can build Rome in a day  
Now I don't need to satisfy, seize to set a tie  
Just the feeling peace and gratify  
If we don't reach for the stars, only reach for satellite  
We live in faded color, but dream in black and white  
I know our demons walk among us

The struggles is something we do know, not something to become us  
So let go of all the suffering and hurt  
Yo, unless we ball it up and we burst

So I can get through this, so I can get through this  
So I can get through this, so I can get through this
