## **Circle Of Fear**

Heartache's knocking on her door Shadows dance outside her window Tears keep falling on the floor As the world around her crambles As the world around her crambles

If you wanna save her Then first you'll have to save yourself If you wanna free her from the hurt Don't do it with your pain If you wanna see her smile again Don't show her you're afraid 'Cause your circle of fear is the same

Love can be as cold as grave A one way ticket to endless sorrow An empire of gentle hate Today without tomorrow

If you wanna save her Then first you'll have to save yourself If you wanna free her from the hurt Don't do it with your pain If you wanna see her smile again Don't show her you're afraid 'Cause your circle of fear is the same

It's the circle of regret The circle of hate The circle of death Your circle of fear is the same Your circle of fear is the same

If you wanna save her Then first you'll have to save yourself (if you wanna save her) If you wanna free her from the hurt Don't do it with your pain (if you wanna free her) If you wanna see her smile again Don't show her you're afraid (if you wanna see her) 'Cause your circle of fear is the same

Your circle of fear is the same (Repeat till end)
